

Congratulations Your New AIG Windows 10 Computer is Here!

This guide will walk you through setting up your new computer for the first time. **It's important that you follow the steps below in the order presented:**

Step 1: Activating OKTA Verify Account

Step 2: Setting up OKTA Verify App on your Mobile Device

Step 3: Logging into Your New AIG Computer

Step 4: Install your Applications

Before you start, ensure the following is completed/available:

1. **If you are at Home**, ensure you have **GlobalProtect VPN** access. If you do not have it, please call the Global Service Desk at 1-800-435-7547 for assistance.
2. **If you are in the Office or your home Wi-Fi is unavailable**, connect a network cable to your computer or use a docking station (*you cannot use AIG's MobileNet WiFi for the first logon*). If your laptop does not have a network port, you can use a Dell USB-C network adapter included in the box you received.
3. You will need a computer and have access to a mobile device (Corporate / BYOMD / Personal) with internet connection to set up Okta Verify.

 when you see the **computer icon**, the activity is on your computer,

 when you see the **mobile icon**, the activity is on your corporate mobile device.

If you have any issues with your new computer or need a helping hand with the process, please call the Global Service Desk at 1-800-435-7547 and press 8 when presented with Menu Options (please note: 8 is not presented as a menu option).

Alternatively, you can use [Chat Support](#).

Step 1: Activating OKTA Verify Account

Pre-requisite:

Before you begin this step, you will need to have the following items handy; you should have received emails from AIG with this information:

- 1) Domain and LAN ID
- 2) Temporary LAN Password
- 3) AIG Email Address

1. If not connected to the AIG network, use a personal computer to access <https://aigtech.okta.com>.

2. At the login screen, enter your **AIG email address** and your temporary **LAN password** provided to you via email.

Note: Please do not copy-paste the password from the email (copying can cause spaces to be included in your password).

3. Once prompted to change your password, create a new password you will remember. Next, re-enter your **AIG email** and the **new password**.

4. Then, you will be prompted to register and create an OKTA account. You will be required to register your mobile device and set a security question.

Error Message: If you received an error message, go to **Slide 9** to resolve the issue.

FW: ACTION REQUIRED: Share LAN ID Inform...

Step 2: Setting up OKTA Verify App on your Mobile Device

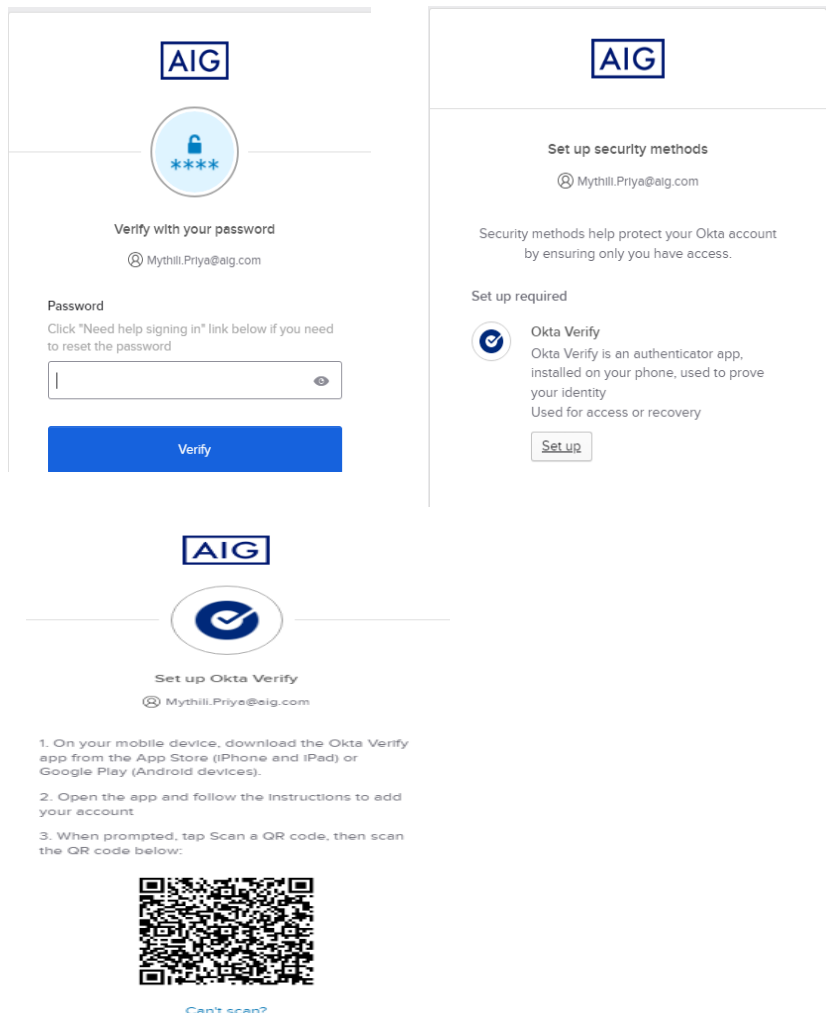

1. Open <https://aigtech.okta.com/app/UserHome> (AIG Okta MyApps Dashboard) in your web browser. Next, click on **your name** at the top right-hand corner of your browser and click on **Settings** dropdown.

2. On the next screen, scroll to the **Security Methods** section and click Okta Verify **Set up**.

3. It prompts to enter your password. Enter your Password and select **Verify**. On next screen click **Setup** for OKTA Verify .

Step 2: Setting up OKTA Verify App on your Mobile Device

5. Download the **Okta Verify App**.

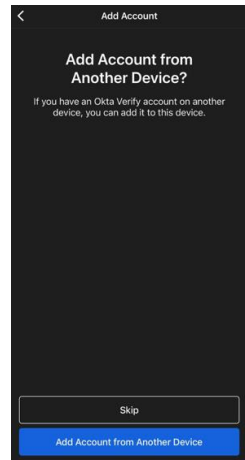

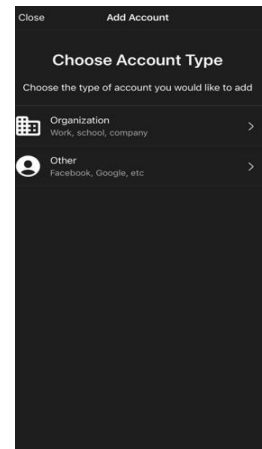

- **For corporate-issued phones:** download from the AIG App Store.
- **For personal devices:** download from the Apple App Store or Android Play Store.

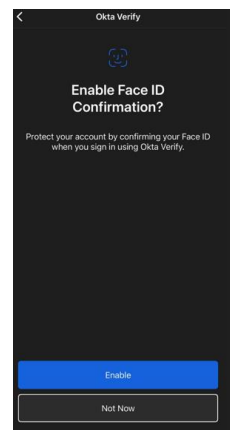

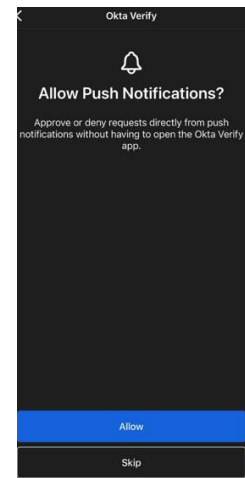

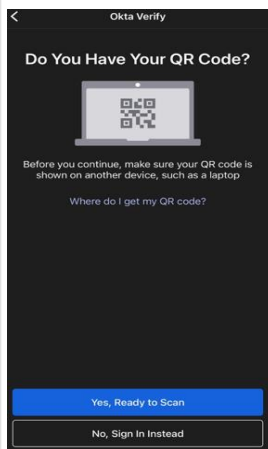

6. Open the **Okta Verify** app, follow the on-screen prompts: **Add Account**.

7. Next select **Organization**, then select **Skip** and click 'Yes ready to scan' to scan the QR code.

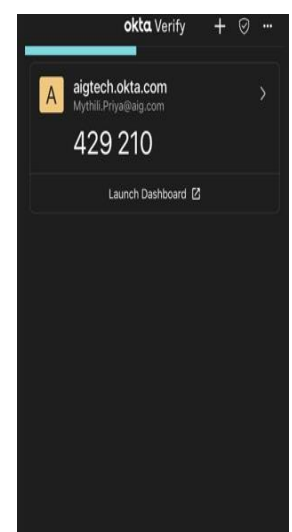

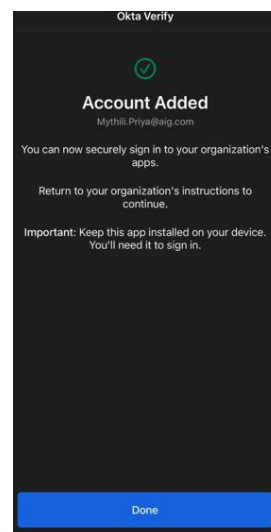

8. Once the barcode scanning window appears, hold your mobile device in front of your computer screen to capture the barcode generated earlier.

9. On next screen, Select **Allow** for Push Notifications and select **Not now** for Face ID confirmation.

10. you will see the confirmation on your mobile device **Account Added** and click **Done**. Then, you will notice the token number changes on your mobile.

Step 3: Logging into Your New AIG Computer (From an AIG Office)

 1. Connect your new laptop to a docking station or connect the power adapter and network cable before powering it on.

 2. Press any key on the welcome screen, and if the legal notice appears, read and acknowledge it by clicking **OK**.

 3. Enter your **AIG Username** and **Password**.

Step 3: Logging into Your New AIG Computer (From Home)

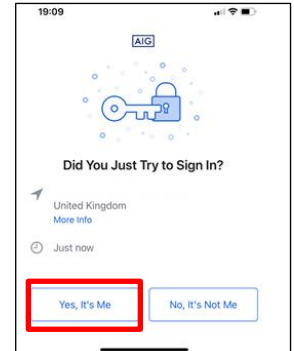

1. Connect the power adapter and power on your new computer. Next, press any key on the welcome screen, and if the legal notice appears, read and acknowledge it by clicking **OK**.
2. Connect your computer to your home Wi-Fi by clicking on the **Internet icon** on the bottom right of your screen (*if you're connecting with a network cable, jump to Step 4*).
3. Click on your home Wi-Fi, select **Connect automatically**, then click **Connect**. Next, enter your network security key (password) and click **Next**.
4. Once connected, click the **VPN icon**. Global Protect VPN connection will start, this may take a few seconds.
5. Once the Okta MFA window appears, enter your **AIG email address** and **password**, next click on **Sign in**. Next GlobalProtect will then initiate the 2-factor authentication, click **Send Push** to continue.

Step 3: Logging into Your New AIG Computer (From Home)

6. Complete the 2-factor authentication from your Okta Verify application by clicking on the notification or by opening the OKTA app, next tap on **'Yes, it's me.'**

7. Once the VPN is established click **Back**, then enter your **AIG username** and **password** to log in to your new AIG computer.

8. Verify that the VPN is still connected to the network: Click the updater arrow on the bottom right of your screen; if the GlobalProtect icon is **blue**, you are connected; if the icon is **grey**, you are not connected. To reconnect click on the **grey GlobalProtect icon**, next click on **Connect**, then go back to **Step 5 (Page 6)** if you need help finalized the 2 factor-authentication.

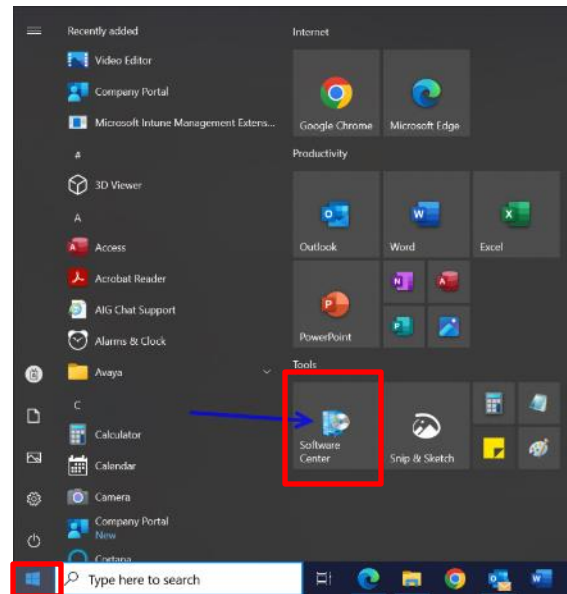

9. Wait for the VPN connection confirmation.

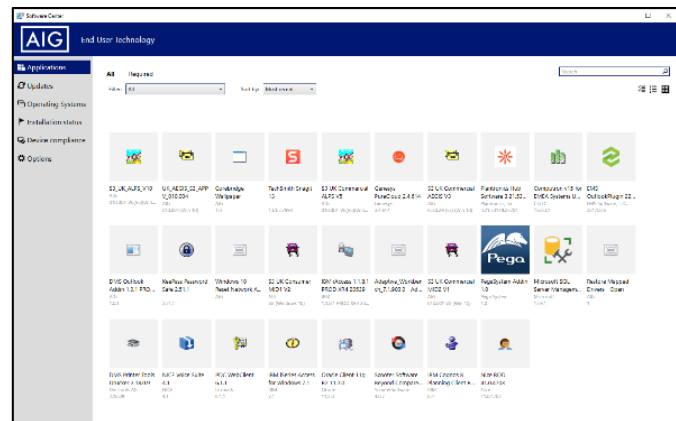

Step 4: Installing Applications

1. Click on the blue Window icon  on the bottom left of your screen to open the **Start menu**, next click on **Software Center**.

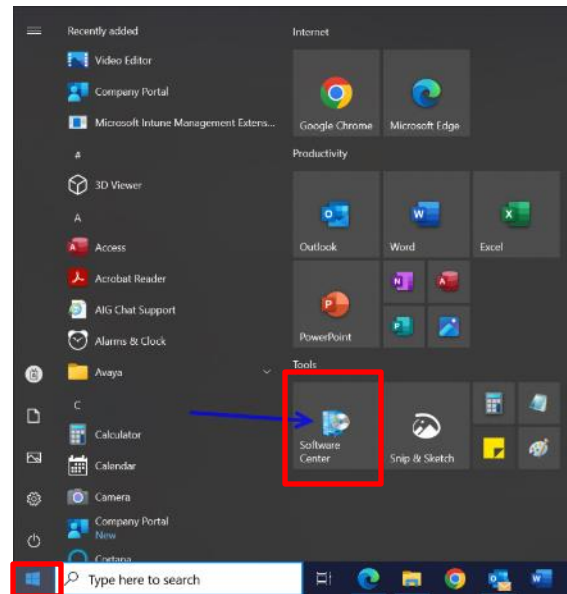

2. When the software center launches, from the Applications tab, click on the **required application** and **Install**. If the Application you require is not listed, please contact the GSD (information for the GSD listed on Slide 1.)

Step 5: Restoring Settings from previous device

1. Click on the blue Window icon  on the bottom left of your screen to open the **Start menu**, next click on **Software Center**.

2. When the software center launches, from the Applications tab, search for [Migration script]. Click on the app and then the Install button
3. Once the Restore script opens, select the computer you would like to restore the data from and check the items you would like to restore. (checking the computer will select all items)
4. Click the Restore button

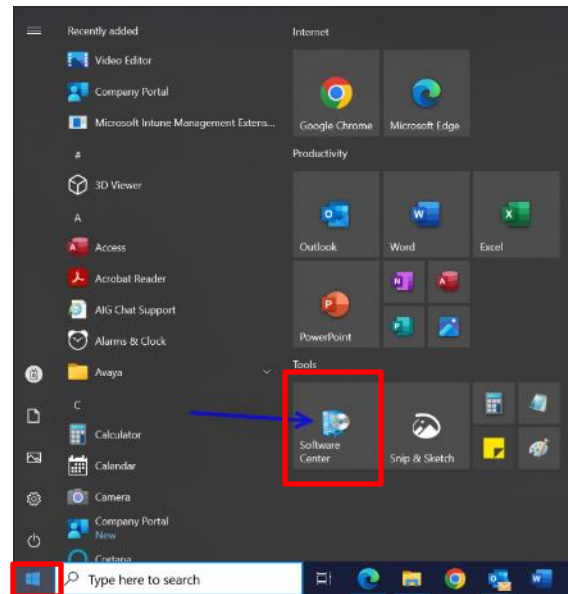

AIG User Data Migration Script Restore 1.0 - User Data Migration Restore Script

Step 5: Restoring Settings from previous device

1. Click on the blue Window icon  on the bottom left of your screen to open the **Start menu**, next click on **Software Center**.

2. When the software center launches, from the Applications tab, search for [Migration script Restore]. Click on the app and then the Install button
3. Once the Restore script opens, if you have an available backup, select the computer you would like to restore the data from and check the items you would like to restore. (checking the computer will select all items)
4. Click the Restore button

Error Messages Resolution Steps

OKTA Account Creation Issue

-  If you receive this error message after creating your OKTA account, please proceed to access OKTA via their website: <https://aigtech.okta.com>, and log in using your **AIG email address** and your **new LAN password** that was set earlier.

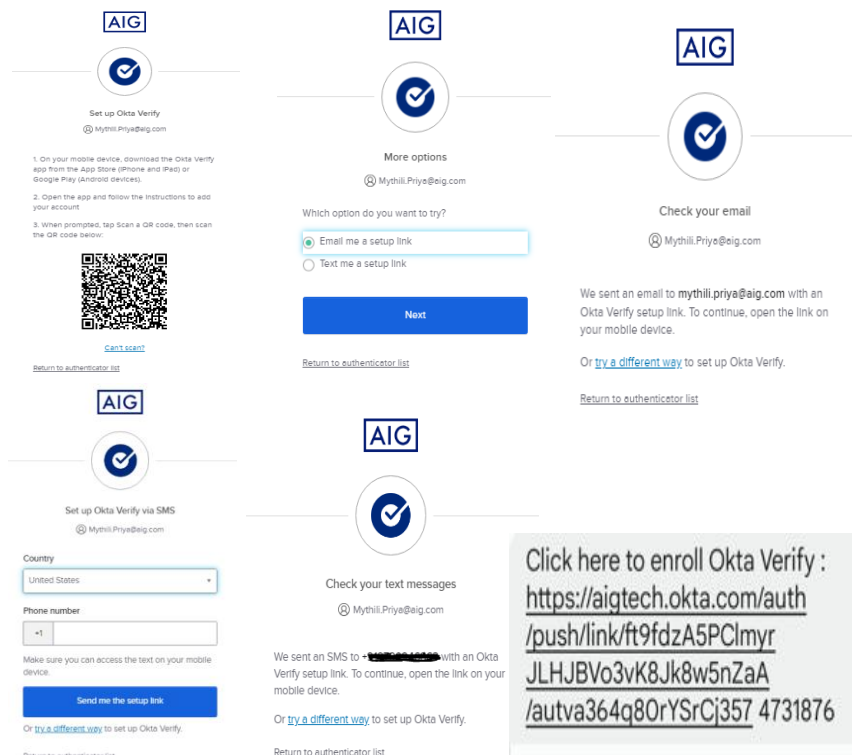

Once you are logged in, proceed with **Slide 3, Step 2: Setting up OKTA Verify App on your Mobile Device**.

OKTA Bar Code Not Scanning

If the barcode does not scan, please follow the steps below to enroll your device manually.

Note: if the network connection is slow, you may get a blank screen, wait for few minutes, and the page will load properly

-  1. Click on the **Can't scan?** option located below the barcode, then select **Email me a setup link** or **Text me a Setup Link** and then click **Next**.

The image displays a sequence of five screenshots from the OKTA Verify setup interface. The first screenshot shows the 'Set up Okta Verify' page with a QR code and a 'Can't scan?' link. The second screenshot shows the 'More options' page with radio buttons for 'Email me a setup link' (selected) and 'Text me a setup link', followed by a 'Next' button. The third screenshot shows the 'Check your email' page with a message from 'Mythili.Priya@aig.com' and a link to the setup page. The fourth screenshot shows the 'Set up Okta Verify via SMS' page with fields for 'Country' (United States) and 'Phone number', followed by a 'Send me the setup link' button. The fifth screenshot shows the 'Check your text messages' page with a message from 'Mythili.Priya@aig.com' and a link to the setup page. A text box on the right side of the fifth screenshot contains the URL: <https://aigtech.okta.com/auth/push/link/ft9fdzA5PClmyrJLHJBVo3vK8Jk8w5nZaA/autva364q80rYSrCj3574731876>.

-  2. You will receive a link either via Email me a setup Link in Inbox or Text me a setup Link in your mobile.

-  3. Click the URL in your mobile that will redirect to Okta Verify app and your account gets added successfully.
